Special Characteristics Information Form

Please describe any special characteristic or circumstance related to your program and/or classrooms that may help the assessors during their observation. Completing this page is optional; however, it does provide you an opportunity to share information that staff would like the assessor to be aware of during the observation, before the teacher interview occurs.

We do not need to know children's names or any private child/family information. It may help to include the name of the teacher and classroom if information is specific to a classroom.

Examples:

- Modifications to activities, transitions, and/or routines for children or staff with special needs
- Intervention strategies related to IEP/IFSP goals or behavior plans
- Special focus, philosophy, or type of programming
- Unique features within your facility, classrooms, or outdoor environment

Please list any special characteristics or circumstances:
