

**Birthdate List:
Classrooms with
Two and Three
Year Old Children**

For a classroom with 2- and 3- year-old children enrolled, please list the birthdate for each child enrolled. Include all children enrolled in the classroom (e.g., both part-time and full-time).

This information is required before random selection or an assessment can begin and is only needed for classrooms that have 2- and 3-year-old children enrolled in the same classroom. If it is easier to provide this information with a computer printout that shows birthdates, or another form already used by your program, that is fine. This information will be returned to you by the end of the assessment. We need to know the children’s exact age to determine the appropriate Environment Rating Scale. On the day of the observation, if half or more of the children are 35 months or younger, we will use the ITERS–3; if most children are 36 months (3 years old) and older, we will use the ECERS–3.

Classroom name (or age group): _____ Lead teacher: _____

Child’s name (first name, last initial)	Birthday (MM/DD/YY)
